Detlef Neuhaus (CEO)
Dr. Armin Froitzheim (CTO)
Sven Schwarz (CSCO)

Supervisory Board

Dr. Achim Wörner (Chairman),
Stefan Quandt,
Hans-Peter Villis,
Felix Ackermann

Pioneers of the solar industry

Founded in 1993, Solarwatt GmbH is one of the German solar pioneers and pioneers in the field of solar-driven sector coupling. The company develops and produces all the essential components of a photovoltaic system in Germany, including extremely durable solar modules, intelligent energy managers and highly efficient power storage. In addition, the Saxon medium-size company enables home and business owners to efficiently self-supply with solar power, sustainable heat and electromobility in a holistic system.

Stefan Quandt, who has been involved with the company since 1998, has been the main shareholder of Solarwatt since the beginning of 2013.

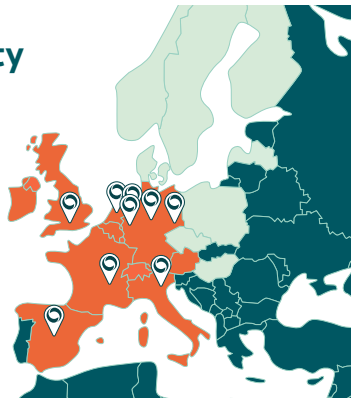

30 Years of experience in the market. Solarwatt is the pioneer in the European solar industry.

9 Million panels sold so far. Another 2.5 million will be sold in 2023.

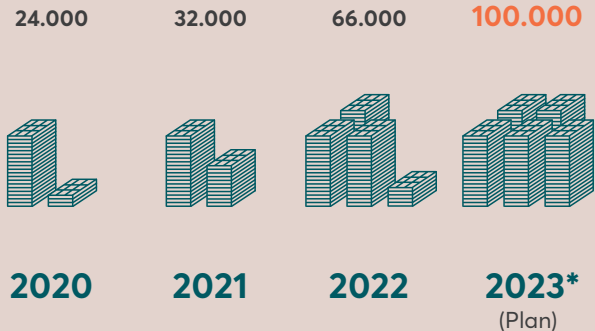

Every **5th** PV-installation up to 10 kWp in Germany comes from Solarwatt.

European activity

- Solarwatt subsidiaries
- Local partners
- Solarwatt office

Installed Systems in Germany and in Europe.

Strategy against the shortage of skilled workers

SOLARWATT Academy

The SOLARWATT Academy, founded in 2021, is Germany's first training center for sector couplers. For our own teams, but also for independent craft businesses, we train career entrants and career changers as well as experienced craftsmen.

Eigene Installer Teams

In order to counteract the bottleneck in assembly capacities, Solarwatt is setting up its own installation teams across Germany to support regional partners. The first locations are in Dresden, Kassel and Bochum..

8.500 Solarwatt installers in Europe from our installer network.

The only German manufacturer with **Cradle to Cradle Certificate® Silver**

Since 1993 we have been driving innovation in glass-glass solar module technology in the residential segment.
